Player needs to be registered for use with your GamePass account.

Please Visit :
http://gamepass.nfl.com/tv

Enter the code below in the prompt
XFVB289SW

Then restart your GamePassTV app.

The HTPC

HTPC (Home Theather Personal Computer), Boxee, Roku, et al. Interface designed for use with "set-top" player that includes a common 6+ button remote (Directional Pad, Select & Back/Menu). This is not inteded to be a full blown replacement to our web console, but rather, a compainon to our great NFL streaming services.

Register The Device:

First time use, the user will be asked to register the device with their GamePass account. There is an advantage of speed this model versus a sign in and password. It will also will help negate repeated events of slow text input via the remote.

A user, ideally, will only ever need to see this screen once.

The HTPC

HTPC (Home Theather Personal Computer), Boxee, Roku, et al. Interface designed for use with "set-top" player that includes a common 6+ button remote (Directional Pad, Select & Back/Menu). This is not inteded to be a full blown replacement to our web console, but rather, a compainon to our great NFL streaming services.

Player Controls:

Stripped down no-nonsense player controls. Pause/Play, instant replay, and jump to live.

Rewind and Fast Forward is controled through the left and right of the directional pad, a la TiVo.

All interface states time out after 8 - 15 Seconds.

Wk. 10 - Greenbay at San Fransisco
